Alexander Babochkin

Devops and platform engineer
Phuket, Thailand

Summary

I have deep experience with:
- DevOps (including k8s, terraform, ansible, vault, gitlab ci, etc...)
- Clouds(AWS, Yandex, Google, OVH).
- Golang(since 2015)
- Linux system (since 2001)
- System architecture including database projecting
- Task composition and management
- My own ideas implementation

I'm the author of devops training platform (https://
devops.lifeisfile.com).

I'm AWS certified solutions architect

Check out my website: https://lifeisfile.com

Experience

Potok.io
DevOps Engineer
June 2022 - Present (1 year 10 months)
Москва, Москва, Россия

Support and development of existing infrastructure. Work with monitoring
using Grafana, Prometheus, Loki. Made Kubernetes backup operator written in
golang with Vault and metrics integration.

Advascale
